# Poppy Gardner Flowers

A former fine art student, Poppy retrained in horticulture and floristry to become a florist by name and by nature. Her arts background has given her a keen eye for colour and form, with an emphasis on tonal arrangements and installations which are seasonally led in their choice of flowers and foliage. Where possible, Poppy uses her gardening training to use her own cut flowers in arrangements or sources them from local growers. We also endeavour to create our designs sustainably, crafting with heritage, foam-free methods.

Our flowers are known for their wild, 'hedgerow inspired' style, and we have worked with clients including Soho House and The Apartment Group, as well as on weddings both in the UK and abroad. We will provide you with a detailed initial consultation and work closely with you throughout the process to realise your floral dreams. Poppy's knowledge and training means that we can not only advise on florigraphy to help create stunning, symbolic bouquets and arrangements but can also come up with ideas that will complement the venue and broader theme of your day.

Our studio is based in Bristol, but we roam happily elsewhere on request.
